Milbourne

It's not hard to see why Milbourne is our most popular Shaker design. Designing a great kitchen is a complicated task with many things to take into consideration. Storage is often overlooked, but the inside of your cabinets is as important as your door and drawer fronts.

We know how important it is to have plenty of practical storage space in your kitchen, keeping your working areas clutter free. Our clever storage systems will provide the perfect home for your foodstuffs, pots and pans and all those items you need to keep close to hand.

**BEAUTIFUL
ON THE
INSIDE**

TOP TIPS FOR THE PERFECT FLOW

The kitchen triangle

The primary tasks in your kitchen are carried out between the hob, the sink and the fridge. The triangle that connects these three areas defines what kitchen experts call an 'efficient kitchen layout'. The triangle is the shortest, most effective way to tread between these three areas and should be considered in your new kitchen design.

Group similar functions

Consider grouping the functions of your kitchen and planning your storage accordingly. There's no point in placing a spice rack yards away from the hob. Specialist trays and inserts for our range of base units help you create highly-functional storage zones.

The perfect serve

Try to imagine where you're most likely to serve up your meals. This is a great place to store your cutlery, plates and bowls. Take advantage of our wide range of drawer inserts to make your life easier and your serves perfect.

Don't be afraid of heights

Many British homes enjoy high ceilings and utilising this extra space should be a priority in all kitchen schemes. Consider doors that open upwards or specify our clever iMove units which allow you to bring the contents of high cupboards down to eye level.

Some of our larders can hold up to a whole weeks' worth of groceries. Getting to the things at the back of your cupboards can be a real hassle. This innovative system moves the whole contents of the cupboard to you, providing easy access to all your items meaning less food goes to waste, which will save you money.
