

Materials & Finishes

To protect your investment and to add value to your home The Green Room only uses the highest quality materials available, our materials are carefully selected to guarantee their stability and longevity.

- Our fascia, soffit and corner post covers are manufactured using using Colorcoat leather grain embossed galvanised steel and PVCu profiles.
- Our high quality PVCu windows and doors offer the best in glazing fitted with 28mm A rated Argon gas filled sealed units.
- Our Colorcoat leather grain galvanised steel, PVCu coextruded rigid foam core and fibre cement wall cladding all offer a long life and a low maintenance alternative to traditional finishes.

The Green Room only uses the highest quality materials available

We offer our external wall cladding in two orientations, horizontal or vertical

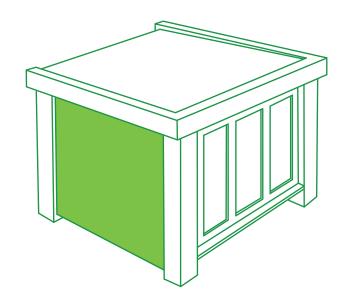

HORIZONTAL WALL CLADDING

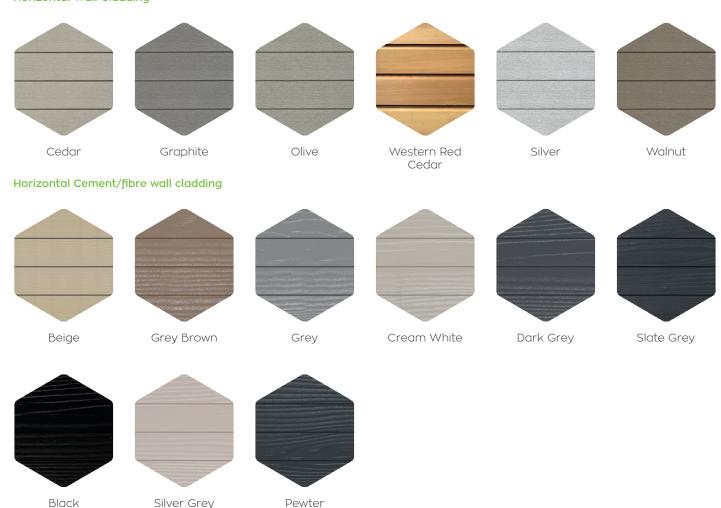

Western Red Cedar. Cedar is a softwood which is highly resistant to decay, as well as resistant to splitting and movement once fitted. When first installed, this wood is a warm reddish-brown colour. If left untreated, it turns the classic silver colour over time depending on how much direct sunlight it receives. In short, Western Red Cedar looks great and can last a life time.

Embossed woodgrain effect PVC co-extruded rigid foam core cladding. Our embossed cladding range benefits from low maintenance and the great insulation properties of PVC but with the unique textured appearance of an embossed wood effect.

Our fibre cement wall cladding range offers both contemporary and flexible design options. The simple combination of wood cellulose, sand, synthetic fibres, water and cement make fibre cement one of the most environmentally friendly and comprehensive building products available.

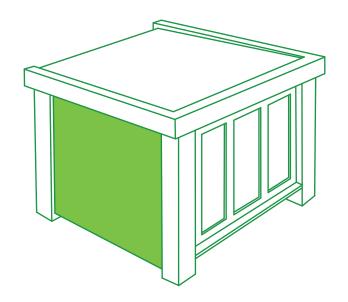

Horizontal Wall Cladding

VERTICAL WALL CLADDING

Colorcoat leather grain embossed galvanised steel cladding. Our Colorcoat range of cladding benefits from low maintenance and the great fire retardant properties of steel.

Western Red Cedar. Cedar is a softwood which is highly resistant to decay, as well as resistant to splitting and movement once fitted. When first installed, this wood is a warm reddish-brown colour. If left untreated, it turns the classic silver colour over time depending on how much direct sunlight it receives. In short, Western Red Cedar looks great and can last a life time.

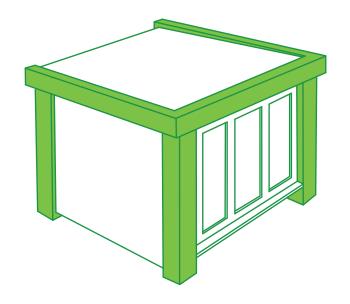

Vertical Wall Cladding

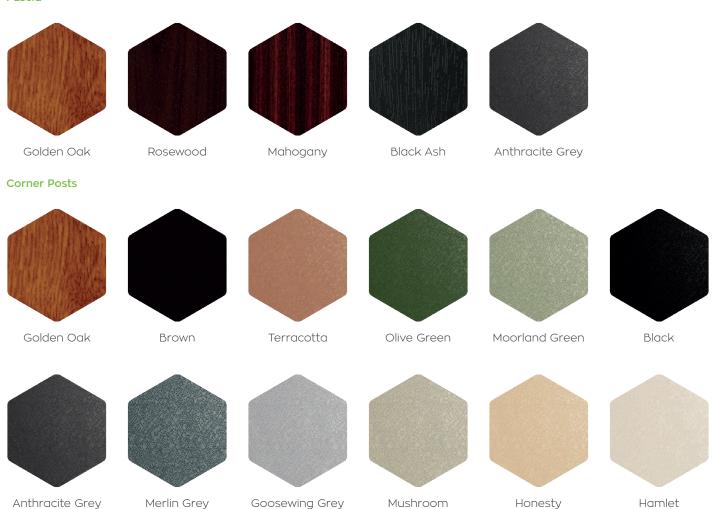

FASCIA & CORNER POSTS

Our fascia, soffit and corner post covers are manufactured using Colorcoat leather grain embossed galvanised steel and PVCu profiles to provide a stylish and attractive maintenance free finish.

WINDOWS & DOORS

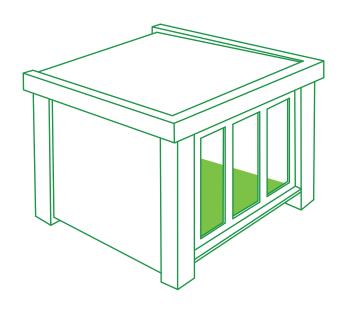

Our energy efficient PVCu window and door systems achieve low U-values and A+++ window energy ratings, they also come in high-recycled content eco options, making our windows and doors, not only the energy efficient choice but a sutainable one too. Offered in a range of colours and impressive whole-of-life eco-credentials in addition to high energy efficiency and security.

FLOORING

The Impressive Ultra range is a collection of extra solid and hardwearing laminate floors that look and feel exceptionally natural. The planks' authentic wood grains, for example, are perfectly reflected into the floor's joints as well. And there's more: thanks to a unique water-repellent 'HydroSeal' coating, Impressive Ultra is not only beautiful, it's also the most waterproof laminate flooring ever produced.

ADDITIONAL REQUIREMENTS

We also offer a wide range of bespoke items from, internal partition walls and doors, flyover roofs and canopies to toilet cubicles, shower rooms, hideaway kitchens, built-in office furniture, wardrobes and foldaway wall beds and much more!

Why not give us a call to discuss your requirements, we will be pleased to provide you with a quotation or send us a rough plan of the design that you are thinking of to info@the-green-room.co.uk
